

Repatriation of Human Remains or Ashes to Fiji:

Procedures for Repatriation of Human remains or ashes to Fiji:

1. A letter of validation and request from your high office (sometime it is done through the airline rep).
2. Copy of passport (validation of the deceased)
3. Documents verifying cause of death (Death certificate)
4. Embalming certificate or cremation validation
5. Medical certificate from Health Authorities (Public health issue... evidence of contagious/non-contagious disease) and other relevant documents pertaining to the cause of death.

Most of the requests are directly done from an undertaker through the various cargo handlers/airline. The agencies know of these requirements. By via upon this information our border control offices are advised for facilitation and necessary clearance procedures. Original documents are to be presented upon arrival.

For more advice on this subject, please do not hesitate to contact Mrs Unaisi Bera. Please find below her contact details:
