

FIJI ENTRY CONDITIONS

Proof of Vaccination: All travellers 16 years and above must produce proof of full vaccination. Please find Fiji Covid-19 Recognised Vaccines list below. Only travellers under the age of 16 years may be exempt, provided they are accompanied by a parent or guardian who is vaccinated. Vaccinated travellers below the age of 16 may travel unaccompanied, observing all international travel protocols. A 14-day waiting period prior to travel following full vaccination applies.

Pre-paid in-country COVID-19 Test: Travellers 12 years and above must produce proof of a pre-booked and pre-paid RAT, to be administered within 72 hours of arrival into Fiji, at any one of the CRMT approved facilities. You can book your in-country test through [entrytestfiji](https://entrytestfiji.fj). This also applies to travellers transiting Fiji for more than 48 hours. For travellers who have turned positive within 30 days of travelling into Fiji and are entering Fiji with a proof of the isolation period served from a credible institution or a fit to fly certificate from a medical practitioner, the prepaid in-country RAT requirement does not apply.

Travel Insurance: Travellers with existing insurance must present evidence of the cover not excluding COVID-19. Alternatively, travellers may opt for [FijiCare](#) COVID-19 travel insurance offered to travellers. All foreign passport holders (except valid permit holders who provide a supporting letter from sponsor/employer to meet all COVID related costs, including isolation if required) must have medical travel insurance, with international coverage that covers COVID-19 before travelling.

Failure To Follow Protocol

Any person who fails to comply with the mandatory requirements under this Protocol as ordered by the Permanent Secretary for Health and Medical Services commits an offence and is liable on conviction to a fine not exceeding \$10,000 or imprisonment for a term not exceeding 5 years or both under the Public Health Act 1935.
